UWAGI

- WYMIARY PODANO W [mm], POZIOMY PODANO W [m].
- ZABEZPIECZENIE ANTYKOROZYJNE KONSTRUKCJI STALOWEJ:
  - CZYSZCZENIE PRZEZ PIASKOWANIE DO STOPNIA CZYSTOŚCI Sa2,5
  - PN-ISO 8501-1
  - ZABEZPIECZENIE ANTYKOROZYJNE DO KLASY C3 ZA POMOCĄ MALOWANIA LUB CYNKOWANIA
  - KOLOR WEDŁUG PROJEKTU ARCHITEKTURY.
  - ZABEZPIECZENIE POŻAROWE KONSTRUKCJI STALOWEJ DO R60 i R30 POPRZECZ MALOWANIE ZESTAWEM FARB PĘCZNIEJĄCYCH
- TOLERANCJA MONTAŻU: ±5mm.
- NIEOZNACZONE SPÓINY WYKONAĆ JAKO PACHWINOWE O GRUBOŚCI 0,5 CIENIEJSZEGO ELEMENTU DLA SPÓIN DWUSTRONNICH ORAZ 0,2 GRUBSZEGO ELEMENTU LUB 0,7 GRUBOŚCI CIENIEJSZEGO ELEMENTU DLA SPÓIN JEDNOSTRONNYCH.
- PRZED ROZPOCZĘCIEM PRAC NALEŻY SPRAWDZIĆ POZIOMY I WYMIARY NA BUDOWIE.
- KONSTRUKCJĘ WYKONAĆ I MONTAŻOWAĆ ZGODNIE Z PN-B-06200:2002.
- NINIEJSZY RYSUNEK NIE JEST PODSTAWĄ DO WYKONANIA ELEMENTU. NALEŻY OPRACOWAĆ PROJEKT WARSZTATOWY.
- ROZPATRYWAĆ Z OPISEM TECHNICZNYM, POWIĄZANYMI RYSUNKAMI KONSTRUKCYJNYMI I RYSUNKAMI BRANŻOWYMI.
- 40.000-06 PROJ. ARCHITEKTURY
- MATERIAŁ – STAL S355

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
